NY Times Best Sellers
Vue App

Build Instructions

These instructions assume that the zip file has been downloaded and extracted.

Step 1:

Open the Terminal (Mac) / Command Prompt (Windows)

Step 2:

CD to the directory

`cd NYTBestSellers`

Step 3:

Install dependency modules

`npm install`

This installs all the required npm modules required for this app to run

Step 4:

Build the project

`npm run dev`

This builds / compiles all the App (Vue, SCSS) files into flat browser understandable HTML, CSS, and JS files of the app to run.

Step 5:

Open the browser and launch

`localhost:3300/`

This loads the html file and all the dependencies to be included.
